## Story Point Assignments

Spaces / SE lab2 / SE-1 / SE-4

Calculate Borrower Credit Risk

+

...

Description

As a peer lender, I want the system to calculate the borrower's credit risk rating based on debt-to-income ratio, repayment history, and employment stability indicators, so that I can assess the borrower's risk before lending.

Review Borrower Risk

Description

As a peer lender, I want to view the borrower's credit risk rating and relevant risk information, so that I can make an informed lending decision.

Generate Repayment Schedule

Description

As a borrower, I want the system to generate a structured repayment schedule with EMI amounts and due dates, so that I know when and how much I need to repay

## Sprints

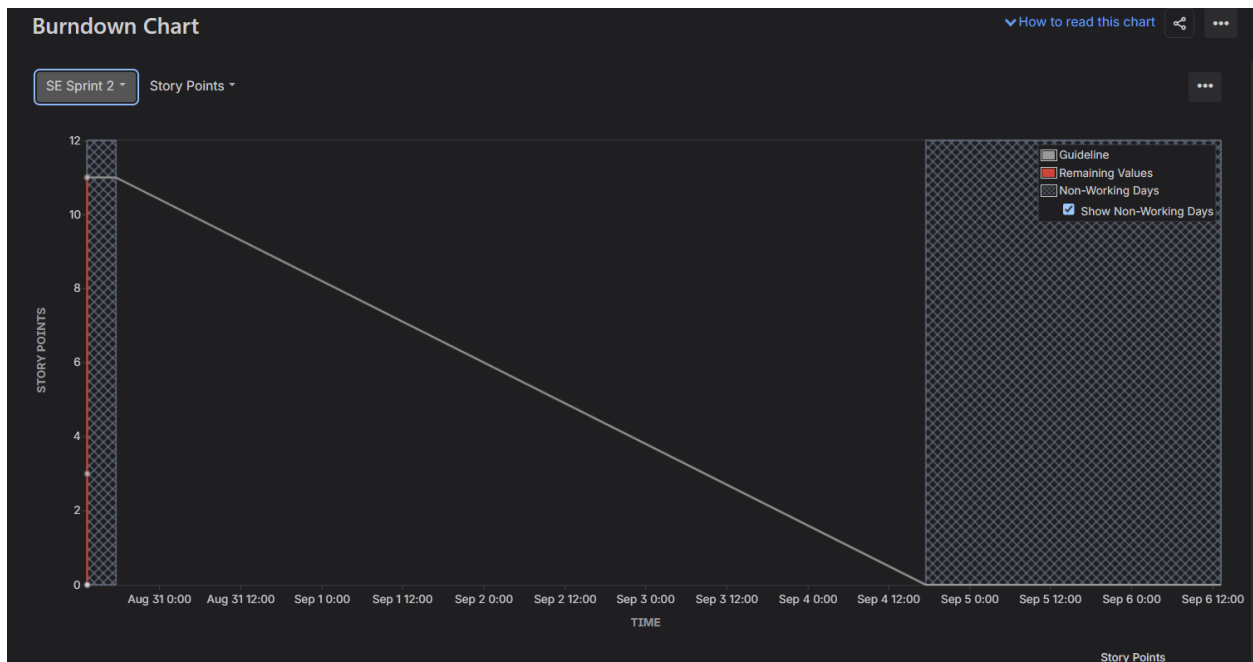

## Active Sprint Board

## Burndown Chart

## Reflection Questions

### 1. Did your estimations reflect the actual effort?

Yes, the story point estimates were reasonably close to the effort required. The larger tasks such as Process Loan Repayment had more points, while smaller tasks had fewer points.

### 2. Was your backlog well-prioritized?

Yes, the backlog was prioritized based on the order in which the major features needed to be completed. The credit risk assessment work was handled before the repayment and default warning features.

### 3. How did your simulated sprint align with your plan?

The simulated sprints followed the planned work. Sprint 1 completed the three planned stories, and Sprint 2 completed the remaining two stories.

### 4. What insights did the burndown chart give about your team's capacity?

The burndown charts showed that the team was able to complete all planned story points. Sprint 1 reduced 13 points to 0, while Sprint 2 reduced 11 points to 0
